

An Internship Report
Of
Gen AI Virtual Internship

Submitted

To

School of Computer Science and Engineering
IILM University, Greater Noida, U.P.

In partial fulfilment of the requirement of degree of
B-Tech (CSE)

By

Roll Number of Student: **2410030917**

Name of Student: **AKEE KUMAR**

Batch: 2026-27

CANDIDATE’S DECLARATION

I, **AKEE KUMAR** do hereby declare that the internship report titled “**Gen AI Virtual Internship**” has been completed by me to fulfil the requirement for the award of the degree of Bachelor of Technology in CSE. All the references have been quoted and I have not taken as such any material from any other source. I affirm to you that this report is my own and has not been submitted to any other institute for any degree/ diploma requirement and further I shall be solely responsible for any kind of copyright violation in this regard.

Signature :

Student Name : **AKEE KUMAR**

Roll No : **2410030917**

ACKNOWLEDGEMENT

I am using this opportunity to express my gratitude to everyone who supported me throughout the Internship Program. I am thankful for their aspiring guidance, invaluable constructive criticism and friendly advice during this work. I am sincerely grateful to them for sharing their truthful and illuminating views on a number of issues related to this work.

I would like to thank the **AICTE – EduSkills Virtual Internship Program team and EduSkills Academy** for providing me the opportunity and the structured platform to learn and gain hands-on exposure in the domain of **Gen AI Virtual Internship**. I am also thankful to my institute, IILM University, Greater Noida, and the faculty of the School of Computer Science and Engineering for their continuous support and encouragement.

I express my gratitude to my parents for their blessings.

Signature :

Student Name : **AKEE KUMAR**

Roll No : **2410030917**

Certificate of Virtual Internship

This is to certify that

Akee Kumar

IILM University, Greater Noida

has successfully completed the 8-weeks

Gen AI Virtual Internship

During April - June 2026

May this Internship learning propel you toward a bright and successful career.

GRADE- O (Outstanding):90-100 | E (Excellent):80-89 | A (Very Good):70-79 | B (Good): 60-69 | C (Fair): 50-59 | D (Average): 40-49 | P (Pass): 30-39 | F (Fail): Below 30

Internship Offer Letter

Ref No: C16Y2026M051414364

Internship Offer Letter

Student Name : Akee Kumar
Stream : B.Tech
Branch : B.Tech(Computer Engineering)
Institute Name : IILM University, Greater Noida
Internship Domain : AWS Gen AI
Internship Duration : April 2026 - June 2026
AICTE Student ID : STU69eb732b631201777038123

We are pleased to inform you that you have been selected for the 8-Week **AICTE – EduSkills Virtual Internship Program**.

During this internship, you will learn and demonstrate industry-relevant skills that will enhance your employability and strengthen your confidence in the subject area.

The program is designed to provide structured learning combined with practical exposure.

Internship Structure & Evaluation:

- The internship will follow a **week-wise structured learning plan**.
- You will be required to complete **weekly assessments** to track your progress and understanding.
- Certain modules will require submission of **project documentation and assignments**.
- In the final week, you must appear for a **Final Assessment Test**.
- The final grade will be based on your overall performance, including weekly assessments, project submissions, and the final test.

Upon successful completion of all required steps and assessments, you will be awarded a **Virtual Internship Certificate**.

Please note that this offer letter will be considered valid only after the successful completion of the internship program and fulfillment of all assessment requirements, including obtaining the final completion certificate. Without the final completion certificate, this offer letter shall not be treated as a valid document for any official purpose.

The week wise Structure of the Internship is as Follows:

Week	Module	Description
Week 1	Machine Learning Foundation	Explore resources, documentation, and whitepapers. Learn machine learning problem-solving with Amazon SageMaker, including demos, data splitting, and training models using XGBoost.
Week 2	Machine Learning Foundation	Forecasting with managed services, explore computer vision for image and video analysis, and get an overview of natural language processing.
Week 3	Machine Learning Foundation	Generative AI, explore Amazon CodeWhisperer and AWS documentation, and prepare for the AWS Certified Machine Learning – Specialty certification.
Week 4	Natural Language Processing	AWS Academy NLP. Learn NLP fundamentals, text processing techniques, and practical applications in natural language processing.
Week 5	Natural Language Processing	Implement sentiment analysis, and explore information extraction and topic modeling for practical NLP applications.
Week 6	Natural Language Processing	Work with languages, implement generative AI solutions, and conclude the course with a comprehensive wrap-up
Week 7	Generative AI Foundations	AWS Academy Generative AI. Learn AI fundamentals, explore generative AI, use prompts and prompt engineering, and work with Foundation Mode.
Week 8	Generative AI Foundations	Generative AI responsibly, address security, governance, and compliance, implement AI solutions effectively, and prepare for related certification pathways.
Final Credential Validation/Internship Grade Point Assessment		

Note: There is no stipend associated with this internship.

We congratulate you on your selection and wish you a successful learning journey.

4. PROJECT DESCRIPTION

4.1 Introduction

This report presents a detailed account of the 8-week AICTE–EduSkills Virtual Internship Program in the domain of AWS Gen AI, completed during April 2026 to June 2026. The internship was undertaken as part of the Bachelor of Technology (B.Tech.) in Computer Engineering programme at IILM University, Greater Noida.

The internship was designed to provide structured learning combined with practical exposure to industry-relevant technologies. The curriculum was provided by AWS Academy and covered important areas including Machine Learning Foundations, Natural Language Processing (NLP), and Generative AI Foundations.

During the internship, the learning progressed from fundamental Machine Learning concepts to Natural Language Processing and finally to Generative AI. The programme included weekly learning activities, assessments, project documentation and assignments, followed by a Final Credential Validation/Internship Grade Point Assessment.

The internship helped in developing an understanding of Machine Learning workflows, NLP techniques, Generative AI concepts, prompt engineering, foundation models, and responsible use of AI technologies. On successful completion of the required internship activities and assessment, a Certificate of Virtual Internship was awarded with an O (Outstanding) grade in the 90–100 range.

4.2 Organization Profile

EduSkills Academy, under the theme “Nation Building Through Skills” provides industry-oriented learning and internship opportunities to students. It collaborates with AICTE to conduct the AICTE–EduSkills Virtual Internship Program under the AICTE National Internship Portal.

The internship was an 8-week AWS Gen AI Virtual Internship with a curriculum provided by AWS Academy. It covered Machine Learning, Natural Language Processing, and Generative AI, including prompt engineering, Foundation Models, and responsible AI practices. The programme combined structured learning with assessments and practical activities to develop industry-relevant AI skills.

4.3 Problem Statement

Artificial Intelligence and Machine Learning are rapidly developing fields with applications in areas such as prediction, language processing, automation, and intelligent systems. However, understanding these technologies requires knowledge of both fundamental concepts and their practical applications.

A major challenge for students is developing a structured understanding of the complete learning path from Machine Learning fundamentals to Natural Language Processing and Generative AI. Without practical exposure, it can be difficult to understand how these technologies are applied to real-world problems.

The problem addressed through this internship was therefore to develop a strong foundation in Machine Learning, Natural Language Processing, and Generative AI, while gaining practical exposure to the tools, concepts, and applications associated with these technologies.

The internship also focused on understanding how Generative AI systems can be used effectively through prompt engineering and foundation models, along with awareness of security, governance, compliance, and responsible AI.

4.4 Project Objectives

- To develop a strong foundation in Machine Learning concepts and applications.
- To understand Machine Learning problem-solving using Amazon SageMaker.
- To gain exposure to data splitting and model training using XGBoost.
- To understand the fundamentals and practical applications of Natural Language Processing (NLP).
- To learn text processing techniques used in NLP applications.
- To understand and implement concepts related to sentiment analysis.
- To explore information extraction and topic modeling for practical NLP applications.
- To develop an understanding of Generative Artificial Intelligence and its applications.
- To understand the role of Foundation Models in Generative AI.
- To improve technical knowledge through structured weekly learning, assessments, assignments, and project documentation.

4.5 Scope of the Project

The scope of this internship covers three major areas – Machine Learning Foundation, Natural Language Processing, and Generative AI Foundations. The internship began with Machine Learning concepts, including the use of Amazon SageMaker, data splitting, model training using XGBoost, forecasting, and computer vision for image and video analysis.

It further covered Natural Language Processing (NLP), including NLP fundamentals, text processing, sentiment analysis, information extraction, topic modeling, and working with languages. The programme also introduced the implementation of Generative AI solutions.

The final stage focused on Generative AI Foundations, including AI fundamentals, Generative AI, prompts, prompt engineering, and Foundation Models. It also covered Responsible Generative AI, with emphasis on security, governance, and compliance.

The internship was conducted as an 8-week virtual learning programme through the AICTE–EduSkills Virtual Internship Program, with the curriculum provided by AWS Academy. It included structured weekly learning, assessments, assignments, project documentation, and a final assessment.

4.6 Technologies and Tools Used

- Machine Learning & Cloud AI: Amazon SageMaker, XGBoost
- Machine Learning Applications: Forecasting, Computer Vision (Image & Video Analysis)
- Natural Language Processing: NLP, Text Processing, Sentiment Analysis, Information Extraction, Topic Modeling.
- Generative AI: Generative AI, Foundation Models.
- Prompt Engineering: Prompts, Prompt Engineering.
- AI Coding Assistance: Amazon CodeWhisperer.
- Responsible AI: Security, Governance, Compliance
- Assessment & Learning: Weekly Assessments, Assignments, Project Documentation, Final Assessment

4.7 System Architecture

The general architecture followed during the internship can be summarized in the following layers:

- **Machine Learning Layer:** Machine Learning models and concepts are introduced using Amazon SageMaker and XGBoost, along with data splitting, model training, forecasting, and computer vision applications.
- **Natural Language Processing Layer:** NLP techniques such as text processing, sentiment analysis, information extraction, and topic modeling are used for processing and analyzing human language.
- **Prompt Engineering Layer:** Prompts and Prompt Engineering are used to provide effective instructions and improve interaction with Generative AI systems.
- **Application Layer:** Generative AI concepts and solutions can be applied to practical AI-based applications and problem-solving scenarios.
- **Responsible AI Layer:** Security, Governance, and Compliance are considered to ensure the responsible and appropriate use of Generative AI technologies.
- **Assessment & Evaluation Layer:** The internship includes weekly assessments, assignments, project documentation, and a final assessment to evaluate the learning and understanding developed throughout the programme

4.8 Methodology

The methodology followed during the internship was based on a systematic approach to develop and deploy an AI-based solution. The major steps involved a

Week	Module	Description
Week 1	Machine Learning Foundation	Explored resources, documentation, and whitepapers. Learned Machine Learning problem-solving with Amazon SageMaker, including demonstrations, data splitting, and training models using XGBoost.
Week 2	Machine Learning Foundation	Learned about forecasting with managed services and explored computer vision for image and video analysis. Also gained an overview of Natural Language Processing.
Week 3	Machine Learning Foundation	Explored Generative AI, Amazon CodeWhisperer, and AWS documentation. Also included preparation for the AWS Certified Machine Learning – Specialty certification.
Week 4	Natural Language Processing	Studied NLP fundamentals, text processing techniques, and practical applications of Natural Language Processing.
Week 5	Natural Language Processing	Worked with sentiment analysis and explored information extraction and topic modeling for practical NLP applications.

Week 6	Natural Language Processing	Worked with languages, explored Generative AI solutions, and concluded the NLP learning component with a course wrap-up.
Week 7	Generative AI Foundations	Studied AI fundamentals and Generative AI. Learned about prompts, prompt engineering, and worked with Foundation Models.
Week 8	Generative AI Foundations	Studied responsible Generative AI, including security, governance, and compliance. Explored effective implementation of AI solutions and prepared for related certification pathways.

The internship concluded with a Final Credential Validation/Internship Grade Point Assessment.

4.9 Expected Outcomes

- Ability to apply Machine Learning problem-solving techniques using Amazon SageMaker.
- Practical understanding of data splitting, model training, and the XGBoost algorithm.
- Basic exposure to forecasting and computer vision using AWS managed services.
- Hands-on understanding of core NLP techniques such as sentiment analysis, information extraction, and topic modeling.
- Working knowledge of Generative AI concepts, prompt engineering, and Foundation Models.
- Awareness of responsible AI practices, including security, governance, and compliance.
- A recognized AICTE – EduSkills Virtual Internship Certificate with an “O” (Outstanding) grade, strengthening readiness for AWS certification pathways.

4.10 Certificates of Completion and Communication Proof

The supplied Internship Completion Certificate confirms that Akee Kumar of IILM University, Greater Noida successfully completed the 8 weeks Gen AI Virtual Internship during April – June 2026. The certificate lists AWS Academy as the curriculum provider and records Certificate ID 4305b709f302bbae68ec and Student ID STU69eb732b631201777038123.

The accompanying email from EduSkills Foundation also confirms successful completion and instructs the learner to log in to the internship profile and download the certificate. The email text describes the programme as an AWS Gen AI internship.

Dear **Akee Kumar**,

🎉 **Congratulations!**

You have successfully completed **10 weeks AWS Gen AI** internship with EduSkills Foundation. Your certificate is ready — please log in to your profile and download it.

📌 Steps to Download Your Certificate:

1. Login at: <https://aict-internship.eduskillsfoundation.org/>
2. Go to the **Certificate Section** from your sidebar
3. Click **Download Certificate**
